

Matrusri

Portal to Take Tests, Watch Videos and Read E-books

Step 1 :- Go to Matrusri Website

Open www.matrusri.com and Click on Login

The screenshot shows the Matrusri website homepage. The browser address bar displays 'matrusri.com'. The website header includes the Matrusri logo (IIT Foundation since 1993) and a navigation menu with links: Home, Programs (with a dropdown arrow), Our Centers, Partner, About Us, and Contact Us. A blue 'Login' button with a lock icon is highlighted with a red rectangle. The main content area features a large blue headline: 'Refresh 40 weeks of school learning in just 30 hours!'. Below this, two bullet points are listed: '1. 40 hours of effective revision in Maths & Science.' and '2. Periodic tests with detailed analysis.' To the right of the text is a video player for the 'Refresher Program' featuring Krishna Rao Akula, Co-Founder & CEO. The video player includes a play button and the text 'Develop higher-order thinking'. The bottom of the video player shows 'a UPrep enterprise' logo.

*Click on Login button to enter your login credentials received on your Email and access the Learnapp

Step 2 :- Login

Enter your Login ID and Password to Access the portal

The screenshot shows the MATRUSRI login interface. A modal window titled "ENTER YOUR DETAILS" is centered on the screen. It contains two input fields: "Institute Id / Email Id *" and "Password *". Below the password field is a checkbox labeled "Show Password" and a link "Forgot Password?". A red arrow points from the "Login ID" label to the first input field, and another red arrow points from the "Password" label to the second input field. The background shows a blurred view of the portal's main content, including a "SIGN UP" button and a "PROGRAMS" section with options like "FOUNDATION PRO FOR CLASS 10".

Q51.	The kinetic energy of 4 moles of nitrogen gas at 127°C is $(R = 2 \text{ cal mol}^{-1} \text{ K}^{-1})$ (a) 4400 cal (b) 3200 cal (c) 4800 cal (d) 1524 cal	SCQ		
		✓ (c)	(c)	00:55 mins
	Chemistry XI	Solution		
Q52.	1 mole of a gas is heated at constant pressure to raise its temperature by 1°C. The work done in Joules is	SCQ		

Solution

Admin (Manager)

Apr 26, 2020

$$\begin{aligned}
 \text{Kinetic energy} &= \frac{3}{2} nRT \\
 &= \frac{3}{2} (4)(2)(400) \\
 &= 4800 \text{ cal}
 \end{aligned}$$

00:00 mins

YOUR ANSWER **A** CORRECT ANSWER **A**

Q4. A hollow sphere of outer radius 9.0cm and inner radius of 8.0cm floats almost half submerged in a liquid of density 800g/cm^3 .
What is the density of the material of the sphere?

A $1.3 \times 10^3\text{kg/m}^3$

B $2 \times 10^4\text{kg/m}^3$

C $4 \times 10^5\text{kg/m}^3$

D $0.9 \times 10^2\text{kg/m}^3$

SOLUTION:
In equilibrium $F_b = w$

C $4 \times 10^5\text{kg/m}^3$

D $0.9 \times 10^2\text{kg/m}^3$

SOLUTION:
In equilibrium $F_b = w$
 $mg = \rho v_s g$
 $m = \rho v_s$
The submerged volume is half the volume enclosed by outer
 $\rho v_s = \frac{1}{2} \times \frac{4}{3} \pi r_o^3$
 $m = \left(\frac{4}{6} \pi\right) (0.090)^3 (800)$
 $= 1.22\text{kg}$

HIDE SOLUTION

Thank you
